

"Nathan has progressed from a non-reader to a 4th grade level faster than I would have dreamed possible... his self-esteem has grown by leaps and bounds, which is especially important for a child with learning disabilities. Thank you, Elaine Burk!"

*-Susan & Steve,
parents of Nathan*

Why is Reading so important?

Reading is the foundation of all other learning skills. Without good reading skills, your child may struggle as an adult in our highly-competitive job market. So now is the time to prepare your child for their future success.

Are your child's reading skills all they could be? It's often hard to know. With today's large classrooms, teachers often can't accurately evaluate the needs of students, or spend enough time developing their skills. And if your child falls behind in reading, it just gets harder and harder for him or her to keep up with the other students...

The Burk Reading Center can help. We have over 18 years of experience in helping children and adults improve their reading skills. In just a short period of time, your child can improve several grade levels. So why wait any longer?

The unique benefits of the Burk Reading Center

Unlike other approaches to reading improvement, the Burk Reading Center works with your child one-on-one. Every minute of every session is focused on your child. And children respond to this warm, caring attention by giving their very best efforts. It's the fastest and most effective way to learn reading.

The Burk Reading Center also uses advanced teaching methods, multi-sensory learning materials, and high quality literature that helps teach your child the love of reading.

The results? Children learn to read, write and spell correctly. They listen more carefully and understand more. They respond in clear, complete sentences. Their confidence and self-esteem grows... these vital changes make them faster and better learners in every area of their lives.

Doesn't your child deserve all this?

Start the learning process today!
